We beg to call special attention to the collection of important books of the 16th century.

The products of the presses of this century, which are very interesting from the point of view of printing and their subject matter will become the object of collectors, especially since the forming of a collection of 15th century books is more and more difficult to-day. We refer for the bibliographical description of these books to: Childs, Sixteenth century books. The publication of a bibliographical tool like this, shows how the 16th century is the coming „collectors-age”.

No. 13

the rebuilding-expenses of the hospital St. James of Compostella and towards the foundation of two chapels in that hospital.

The Indulgence consisting of 12 lines, has the four opening words printed in Caxton's **type 8**, the rest in his **type 7**. Below there are two **woodcuts** one a woodcut-copy of the seal of the hospital of St. James of Compostella, (see reprod.) the other a xylographic reproduction

of the signature of the above mentioned, Alfonsus de Losa, with an addition to it with his own hand. Between the woodcuts are traces of a seal in red wax.

There are two settings of which ours is setting **A**, having as the last word of the last line but one, **sigillate** instead of **sigillate et**, as in setting **B**. See Gordon Duff, Fifteenth century English books.

Our copy wants 6 words and parts of five others in the top right-hand corner. The damage only affects the two top lines and the upper portion of the third. The missing portion only measures 37×10 mm.

The copy consists of two pieces, very neatly joined together. One larger- and two tiny wormholes, otherwise in fine condition. — See reprod. above.

Goth. char. 78 ff. 2 columns. Hain 5423. **Not** in BMC. III. Harris 42. Stockmeyer u. Reber p. 12 no. 7. **Not** mentioned by Scholderer in his article on Wenssler and his press. Only **one** copy in America, acc. to Census.

Rom. char. 136 pp. 50 lines. Hain-Cop. 6694. Proctor 7130. Acc. to Census **only 2 copies known in America**. Fine, **large**, copy with woodcutborder and figures quite intact. The first few pp. only slightly frayed and thumbled and the margins between the two pages waterstained. **Second edition** of Euclid, even rare than the first. There were only 2 editions printed in the 15th century. The first page has a **splendid woodcutborder on 3 sides, engraved entirely in line** and cont. figures of birds, amorini, beasts, etc. **interwoven with a floral scroll**.

The translation has been made by Adelard of Bath, an Englishman. Adelard or Bethelhard was one of the greatest philosophical authors of the 13th century and travelled through Spain, the North of Africa, Greece and Asia Minor. That he knew greek is almost certain; but it has not been determined whether this translation of Euclid was made from the Arabic version or from the original.

On either supposition the instance of English mediaeval scholarship is a striking one, and Bethelhard is one more disproof of the theory of the blank ignorance and obscurantism of the Middle Ages. (Bibl. Chem.-Math.)

18 **Ferrer, Vincent**, Sermones, pars Estiualis. **Basilee**, (Nic. Kessler) 1488. Orig. calf (rebacked), sm. in —folio. f 170.—

Hendrik van Gorkum was born at Gorinchem towards the end of the 14th century. In 1419 we find him at Cologne where he lectured philosophy. From 1420—1431 he was first guardian of the Collegium Montanum in the same town. Van Gorinchem was an ardent partisan of the catholic church and his many works on the theological subject were still published in the 17th and 18th century.

22 **Justinus**, *In Trogi Pompeii historias exordium. Veneciis*, Ph. Petrus, 1479. Calf (18th century), sm. in —folio. f 325.—

Rom. char. 8 ff. 33 et 34 lines. Hain 10257. No copy in America, acc. to Census. Interesting medical incunabulum. Lower margin of the first 3 pp. damaged and with a small wormhole in the text.

Roman char. 1) *Compendiosa doctrina* 144 ff. 37 lines. 2) *Festus*, 54 ff. 37 lines. 3) *Varro*, 50 ff. 37 lines. Hain 11903. Although Hain gives the above three books under one number, they are really three books, being separately numbered and with separate signature. Proctor gives them therefore under nr. 6856—6858. — Nice copy, only the *Festus* lacking a 4 and a 6 and having a few leaves very stained, and the *Compendiosa* with first leaf (index) torn, with loss of some words, and mounted. **Interesting specimen of early printing in Parma**, the output of which was very small. Only 2 (one?) copies known in America, acc. to Census.

28 **Panormitanus, Nicolaus, de Tudeschis**, *Lectura super quinque libros decretalium*. Vol. III. (**Venice**) Vendelin (de Speier), 1471. H. calf, over orig. wooden boards, with 4 clasps, in —folio. f 1100.—

In the margin of the first page a coat of arms, composed of a brown shield with two crossed branches of green with three lilies (heightened with gold) on a ground of pale blue. Roman char. 92 ff. 32 lines. Hain-Cop. 13221. Proctor 6149. Only 3 copies known in America. **Splendid copy**, with **large margins**, with printer's mark at end. Although Hain mentions 2 pp. of *Emendationes*, same are generally lacking. The **only copy** we were able to trace with those 2 leaves, is in the John Rylands library. — Interesting work, having for the **first time** a hymn of Callimachus εἰς ἑορταὶ τῆς παλλαδὸς. The Greek type used for this purpose is of great interest and very artistic. „In 1489 . . . a new Greek fount of **no small interest** makes its appearance. It occurs in the *Miscellanies* of Poliziano, printed by Antonio Miscomini, and finished in September of that year. This work, contains

besides isolated Greek passages, the **original text** of an entire hymne of Kallimachos, occupying more than four pages . . . The type is in some ways unlike any other though the model for it may be found in the Parma fount The individual letters are mostly admirable and the general effect is certainly very good, in spite of an excess of white between the lines." (Proctor, *Printing of Greek* p. 133). The **second book printed in Florence with Greek type** (the first being the Homer of 1488). See reprod. below.

Important also as „Americum” cont. in book 3 of the 4th decade a passage relating to **Columbus**, „... and which derives its importance chiefly from the great stress laid upon it by Fern. Columbus.... to make the readers believe that his father could reckon among his ancestors the Cilio mentioned by Tacitus” (Harrisse, Bibl. Vet. 21 p. 53—54).

Sabellicus appointed professor at Venice in 1484 had to fly to Verona in 1485 on account in the pest. There he finished his: *Rerum Venetarum* of the S. Marco library.

MANUSCRIPTS.

- 37 **Chain-binding — Milis, Joh. de**, *Repertorium juris*. Latin manuscript by Georg Neuburg of Neuremberg, 1458. W. 20 very fine initials in colours of green and blue on golden ground with foliation and heigthened with gold. H. calf, over wooden boards, sm. in —folio. f 600.—

Interesting and important manuscript of Milis' *Repertorium Juris* which was printed in 1488 by Kessler in Basel. At the end the writer states: Et sic est finis hujus Repertorii Scriptum per me Georgium Newburg de Newburga proxima die post diem Sct. Galli anno millesimo quadringentesimo quinquagesimo octavo.

The *Repertorium* contains in alphabetical order all concerning law. The initials form the whole alphabet — with exception of the K. X. and Y.

The manuscript is contained in an original half calf binding **with wooden boards (wormed) with a long iron chain measuring 45 cm.**

- 38 **Origenes**, *Expositione super epistolam Pauli ad Romanos e greco in latinam traductae per Ruffinum: Sermo de Joseph quem vendiderunt fratres eius in Egypto: Omelia super Ewangelio Johannis*. — **Manuscript**, neatly written at Campen, **1390**, in gothic type, resembling English work, double columns of 38 lines, red and black, on 186 leaves of vellum, 12½ by 9 in. Brown leather, (rebacked) blind line frames and diagonals over wooden boards, title

on vellum slip below pane of horn fastened down with brass frame. Sm. in —folio. Sold

The work is signed on fol. 177 by the scribe "... scripti et finiti per Erembertum v'cen(?) Leen Curatum ecclesie Campensis anno domini 1390 mensis februarii die 27. deo laus." The rubrication seems to have been done by the same person, for he has signed himself at the end of the book: "Leen": he has drawn many human profiles in red in margins, probably to mark certain passages and also has turned flourishes into coats of arms.

Campen or Kampen is a seaport on the Zuyder Zee, near Zwolle, anciently one of the most important Hanse Towns. There are two churches, S. Nicolas & S. Mary, both dating from the 14th century.

Besides for the reference to the invention of printing the book is important from the typographical point of view as being the crown of German mediaeval craftsmanship in bookbuilding.

On p. 290 there is an important passage stating that Jam. Canus a. Martin Behaim sent by John II of Portugal to the Southern Sea had seen a new world. Harris, no. 13 says: „The name of Behaim is so closely connected with the controversies which sprung up towards the end of the last century regarding the real discoverer of the Western World and the Straits of Magellan, that it explains, if it does not authorize, the insertion of Schedel's Chronicle by our works.”
